Mockup Review Notes

- Concept is very clear -- design is consistent, well organized, and super visually interesting
 - Overall a really fun experience to look at and really makes me want to explore the website more!
- We are leaning towards mockup set B for a bit more visual interest but taking some elements from the first mockup set
 - Mockup set B is colorful and more dynamic
 - Goes with the tone of the music
- Colored background from mockup set A works well
 - Bring this into set B -- possibly an off white or beige color?
- Images in a row rather than grid: also bringing from set A to set B
- Site is buildable, clear path for actually executing the HTML
- Nav bar could be more prominent? Adding a background color or making the text bigger
 - Also planning on making the nav bar sticky
